

MATTHEW L. WRIGHT

St. Olaf College
1520 St. Olaf Avenue
Northfield, Minnesota USA

office: 507.786.2133
wright5@stolaf.edu
www.mlwright.org

EDUCATION

- University of Pennsylvania** (Philadelphia, Pennsylvania) August 2011
Doctor of Philosophy in Mathematics
Thesis: *Hadwiger Integration of Definable Functions*
Advisor: Robert Ghrist
- Messiah College** (Grantham, Pennsylvania) May 2006
Bachelor of Arts
Major in Mathematics and Computer Science, Minor in Spanish

APPOINTMENTS

- St. Olaf College** (Northfield, Minnesota)
Director of Mathematics June 2022 – June 2025
Associate Professor August 2021 – present
Assistant Professor August 2017 – August 2021
Visiting Assistant Professor August 2015 – August 2017
- Institute for Mathematics and its Applications** (Minneapolis, Minnesota)
Postdoctoral Fellow August 2013 – August 2015
- Huntington University** (Huntington, Indiana)
Assistant Professor of Mathematics August 2011 – May 2013

GRANTS AWARDED

- PI: NSF DMS-1606967, total award \$210,217** September 2015 – August 2019
Computation and Visualization of Multi-Parameter Topological Invariants of Data
Co-PI: Michael Lesnick (U. Albany)
- Inclusive Teaching and Active Learning in Calculus (ITALICs); \$10,920** 2018 – 2019
Collaborative project with MSCS faculty, funded by the *To Include is to Excel* Mellon
Foundation grant to St. Olaf College.
- Co-PI: NSF DMS-1642637, total award \$34,300** January – December 2017
CBMS Regional Research Conference on Topological Data Analysis
PI: Lori Ziegelmeier (Macalaster); Co-PI: Matthew Richey (St. Olaf)

RESEARCH INTERESTS

The goal of my research is to develop mathematical tools for topological data analysis. My focus is on the computation and visualization of multiparameter persistent homology and its use in the analysis of complex data. I also study topological and geometric integrals and their applications.

MATTHEW L. WRIGHT

SOFTWARE AND MULTIMEDIA

RIVET: software for computing, visualizing, and exploring two-parameter persistent homology; developed with Michael Lesnick; github.com/rivetTDA/rivet.

Introduction to Persistent Homology: video, appeared in the 25th Multimedia Exposition in Computational Geometry (2016); youtu.be/2PSqWBIm90.

AWARDS AND HONORS

| | |
|--|-------------------|
| Best New Software Award, ATMCS7, for the <i>RIVET</i> software Awarded jointly with Ripser (Ulrich Bauer) | 2016 |
| Postdoctoral Fellowship, Institute for Mathematics and its Applications | 2013 – 2015 |
| Ben Franklin Fellowship, University of Pennsylvania | 2006 – 2011 |
| Good Teaching Award, Penn Math Department | Spring 2011, 2008 |
| Penn Prize for Excellence in Teaching by Graduate Students | April 2008 |
| William Lowell Putnam Mathematics Exam | |
| Scored 30 on the 2005 Putnam Exam (rank 256 nationally) | 2005 |
| Scored 31 on the 2004 Putnam Exam (rank 287 nationally) | 2004 |

BOOK EDITED

Heather A. Harrington, Mohamed Omar, and Matthew Wright, editors (2017). *Algebraic and Geometric Methods in Discrete Mathematics*, Contemporary Mathematics vol. 685, American Mathematical Society.

MATTHEW L. WRIGHT

TEACHING EXPERIENCE AT ST. OLAF COLLEGE

- MSCS 390: Mathematics Practicum** January 2020
Supervised teams of students working on applied math and data science consulting projects for off-campus organizations.
- MATH 384: Advanced Computational Mathematics** Spring 2024
A computationally-focused study of advanced mathematical topics such as combinatorial optimization and simplicial topology.
- MATH 330: Partial Differential Equations** Fall 2017, Fall 2018, Fall 2019, Fall 2023
A study of partial differential equations: how they arise from physical principles and conservation laws, how they model physical behavior, and how to construct and interpret solutions to them.
- MATH 282: Introduction to Computational Geometry** Spring 2019, Spring 2021, Jan. 2023
A study of theorems, proofs, algorithms, and applications of discrete and computational geometry. Topics include convex hulls, triangulations, Voronoi diagrams, polyhedra, and more.
- MATH 262: Probability Theory** Fall 2023 and eight previous semesters
An introduction to the mathematical theory of probability, including sample spaces and events, random variables, discrete and continuous distributions, and joint distributions.
- MATH 242: Modern Computational Math** Spring 2024 and six previous semesters
A course about computation (using computer algebra systems and programming languages) as a means of mathematical exploration and discovery.
- MATH 234: Discrete Mathematical Reasoning** Fall 2022
A study of the key concepts of discrete mathematics (logic, set theory, functions, and more) and an introduction to formal proof. Required for the computer science major.
- MATH 230: Differential Equations** Fall 2020 and four previous semesters
An introduction to qualitative, analytic, and numerical approaches to differential equations, including linear and nonlinear systems of differential equations.
- MATH 126: Calculus II** Fall 2015, Spring 2017, Fall 2019
A study of integration techniques and applications, concepts of sequences and series, and partial derivatives and multiple integrals.
- CSCI 121: Principles of Computer Science** Spring 2016, Spring 2017
An introduction to the fundamental concepts of computer programming, using the Python language.
- CSCI 125: Computer Science for Scientists and Mathematicians** Fall 2020
An introduction to programming in Python, with a focus on writing programs to solve quantitative problems and for data analysis.

MATTHEW L. WRIGHT

MENTORING EXPERIENCE

- Summer Research Mentor (St. Olaf College) Summer 2022
Supervised three students exploring concepts in computational mathematics; in particular, seeking to understand certain identities for generalized Fibonacci sequences.
- Domain Expert (Center for Interdisciplinary Research, St. Olaf College) F 2020 – S 2021
Worked with three students studying properties of degree-Rips bifiltrations constructed from random point clouds.
- Summer Research Mentor (St. Olaf College) Summer 2019
Worked with two students on improving the graphical interface and documentation for the RIVET software for topological data analysis.
- Summer Research Mentor (St. Olaf College) Summer 2018
Worked with two students on applying two-parameter persistent homology to the data and developing statistical techniques.
- Domain Expert (Center for Interdisciplinary Research, St. Olaf College) F 2017 – S 2018
Worked with four students studying notions of distance between persistence modules and applications to data analysis.
- Summer Research Mentor (St. Olaf College) Summer 2017
Worked with two students on applying two-parameter persistent homology to the study of real-world data.
- Summer Research Mentor (St. Olaf College) Summer 2016
Worked with two students on mathematical and algorithmic problems necessary for the implementation of parallel computation of multiparameter persistent homology.
- Research Mentor for the MAXIMA REU (IMA) Summer 2014
Worked with a group of students investigating geographic proximity and semantic relatedness by mining data from Wikipedia and conducting a survey.

SELECTED LECTURES PRESENTED

- MAA North Central Section Spring Meeting (Minneapolis)
“Computational Mathematics: A Way of Thinking” April 2024
- MAA North Central Section Fall Meeting (Grand Forks, ND)
“Polynomial Identities for Generalized Fibonacci Sequences” October 2022
- Creighton University Mathematics Colloquium (Omaha, NE)
“Persistent Homology: Discerning the Shape of Data” September 2019
- Southeastern Undergraduate Mathematics Workshop at Georgia Tech (Atlanta, GA)
Four-lecture minicourse on Topological Data Analysis August 2019
- SIAM Applied Algebraic Geometry 2019 (Bern, Switzerland)
“Multiparameter Persistence: Brief Background and Current Challenges” July 2019

MATTHEW L. WRIGHT

- MSU Computational Math, Science, & Engineering Colloquium (E. Lansing, MI)
"Visualizing Multiparameter Persistent Homology" October 2018
- Applied Algebraic Topology 2017 (Sapporo, Japan)
"Multidimensional Persistence: Computation and Applications" August 2017
- Computational and Statistical Aspects of Topological Data Analysis (London, UK)
"Computing Multidimensional Persistent Homology" March 2017
- SIAM Central States Section Meeting, Applied and Computational Topology Mini-Symposium
"Computing Multidimensional Persistent Homology" October 2016
- Applications and Statistics of Multidimensional Persistence (Lausanne, Switzerland)
"Efficiently Computing the Bigraded Betti Numbers" August 2016
- Symposium on Computational Geometry (Boston, MA)
"Visualizing Multidimensional Persistent Homology" June 2016
- Section NExT Invited Lecture; MAA North Central Section Meeting (St. Paul, MN)
"Introduction to Persistent Homology" April 2016
- Applied Topology and High-Dimensional Data Analysis, University of Victoria (Victoria, Canada)
"Euler Characteristic and Data Analysis" August 2015
"Computing Multidimensional Persistent Homology" August 2015
- Algebraic Topology: Computation, Data Analysis, and Applications, U. Oxford (Oxford, UK)
"Introduction to Persistent Homology" February 2015
"Multidimensional Persistence Computation" February 2015
- Math, Stats, and CS Seminar, Macalester College (Minneapolis, MN)
"How many ways are there to juggle?" February 2015
- School on Topological Data Analysis and Stochastic Topology, CIMAT (Guanajuato, Mexico)
"Computing Persistent Homology" January 2015
"Visualizing Multidimensional Persistent Homology" January 2015
- Computer Science and Mathematics Lecture, Bryn Mawr College (Philadelphia, PA)
"Euler Characteristic and Data Analysis" November 2014
- Industrial and Applied Mathematics Seminar, University of Oxford (Oxford, UK)
"Visualizing Multi-Dimensional Persistent Homology" November 2014
- Math Department Colloquium, University of Mary Washington (Fredericksburg, VA)
"Euler Integration and Applications" October 2014
- Statistics and Topology Seminar, Technion (Haifa, Israel)
"Intrinsic Volumes of Random Cubical Complexes" May 2014
- Postdoc Seminar, Institute for Mathematics and its Applications (Minneapolis, MN)
"Intrinsic Volumes of Random Cubical Complexes" April 2014
"Hadwiger and Lefschetz: Valuations on Simplicial Maps" December 2013
- Geometry, Topology, and Data Seminar, The Ohio State University (Columbus, OH)
"Hadwiger Integration and Applications" November 2013

| Geometric & Topological Methods in Computer Science (Aalborg, Denmark) | January 2010 |

MATTHEW L. WRIGHT

INSTITUTIONAL SERVICE

| | |
|--|---------------------------|
| Assistant Director of External Fellowships, St. Olaf College | June 2023 – May 2026 |
| Tenure-Track Hiring Committee, St. Olaf MSCS Department | Fall 2023 |
| Faculty Governance Committee, St. Olaf College | September 2022 – May 2024 |
| Tenure-Track Hiring Committee, St. Olaf MSCS Department | Fall 2022 |
| Health Professions Committee, St. Olaf College | March 2019 – June 2022 |
| Assessment Committee, St. Olaf College | September 2018 – May 2020 |
| Tenure-Track Hiring Committee, St. Olaf Physics Department | Fall 2019 |
| Tenure-Track Hiring Committee, St. Olaf MSCS Department | Fall 2018 – Spring 2019 |
| Tenure-Track Hiring Committee, St. Olaf MSCS Department | Fall 2017 – Spring 2018 |

PROFESSIONAL SERVICE

| | |
|--|------------------------------|
| Mathematics Magazine Editorial Board | January 2024 – present |
| MAA Classroom Resource Materials Editorial Board | January 2023 – December 2025 |
| Organizer of invited and contributed paper sessions on computational mathematics at MAA MathFest 2021 | August 2021 |
| Organizer of minisymposium <i>Multiparameter Persistence: Algebra, Algorithms, and Applications</i> at SIAM Applied Algebraic Geometry 2019 | July 2019 |
| Co-organizer of <i>Tutorial on Multiparameter Persistence, Computation, and Applications</i> , at the IMA (with Michael Lesnick) | August 2018 |
| Co-organizer of <i>Topological Data Analysis: Theory and Applications</i> , at Macalaster College (with Lori Ziegelmeier and Matt Richey) | June 2017 |
| Co-organizer of <i>AMS Special Session on Applied and Computational Topology</i> at the 2016 JMM (with Nick Scoville and Paweł Dlotko) | January 2016 |
| Co-organizer of <i>AMS Special Session on Algebraic and Geometric Methods in Applied Discrete Mathematics</i> at the 2015 JMM (with Heather Harrington and Mohamed Omar) | January 2015 |

LANGUAGE AND COMPUTER SKILLS

English: complete fluency

Spanish: near fluency; studied in Quito, Ecuador for the Fall 2003 semester

Experience in Mathematica, R, Unix, Java, JavaScript, C++, Python, HTML, CSS, PHP, and MySQL
